

DEMAND-GENERATION ENGINE · CHINESE EVS IN EUROPE

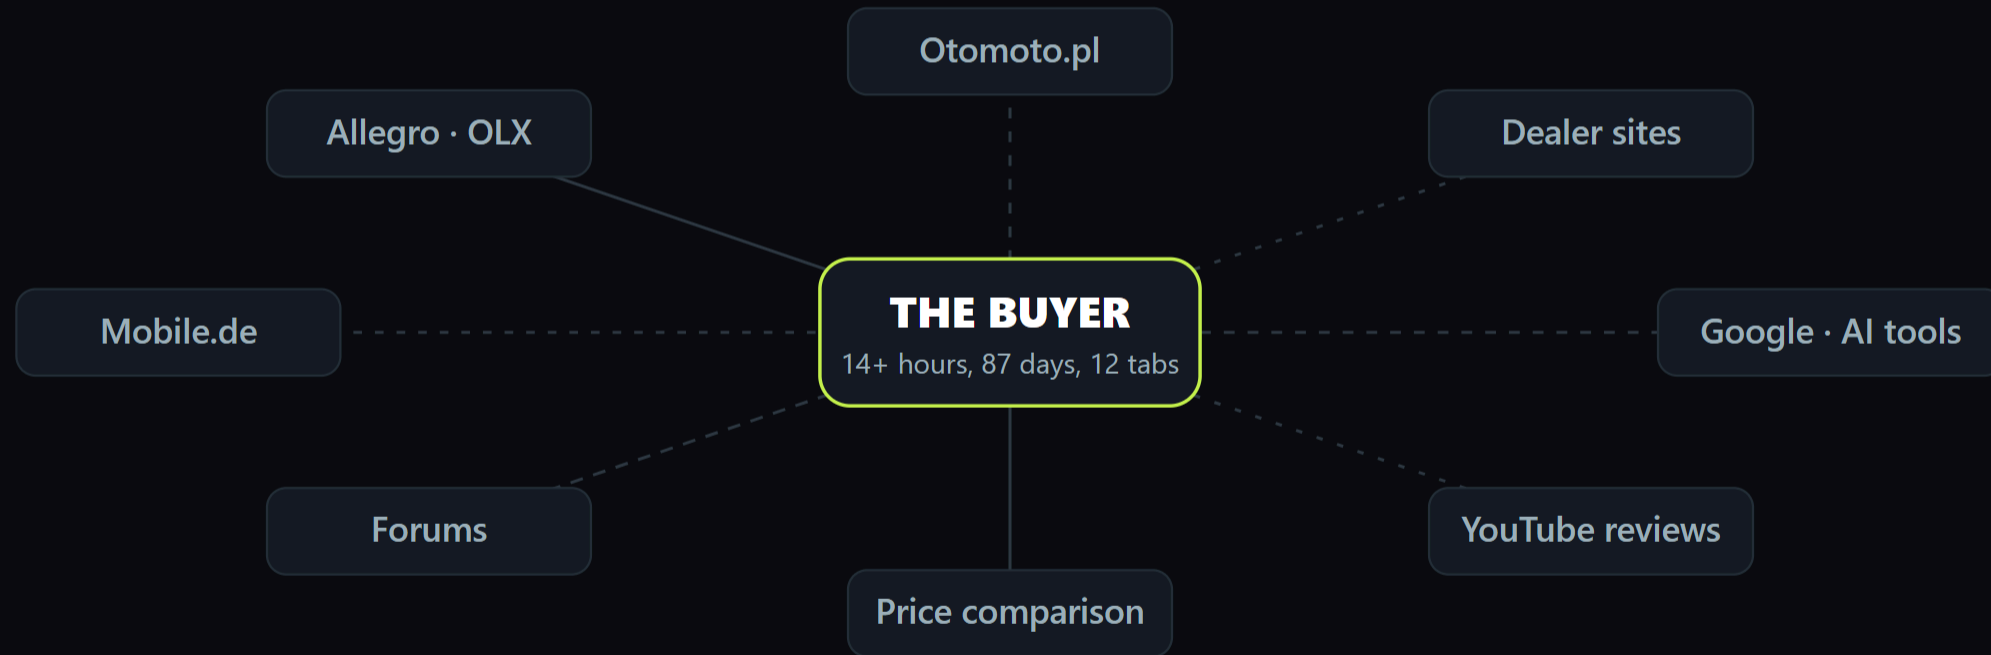

Every buyer's journey starts **online.**

We guide online car buyers to the right sellers
offline — and make Chinese EVs the obvious
choice along the way.

Angel round · raising **€38k for 8%** · Baltic Oranges · 2026

THE PROBLEM

Choosing a car online is fragmented — and Chinese brands are invisible.

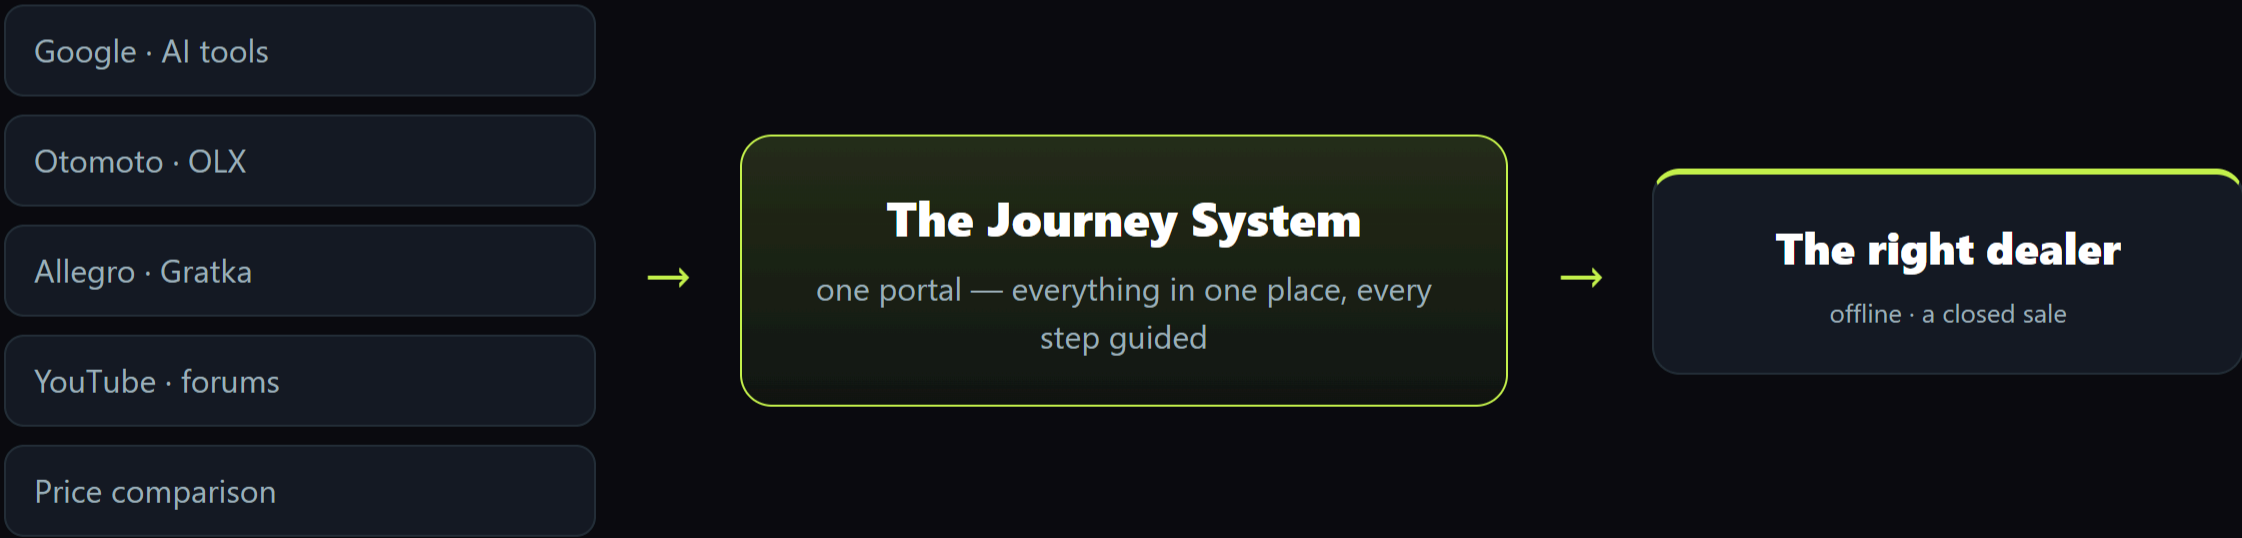

context 90% of buyers research online before buying — yet Chinese brands like **BYD** and **Zeekr** stay invisible in organic and AI search.

THE SOLUTION · IN ONE LINE

We guide online buyers to the right sellers — offline.

Scattered buyers land in one portal — then we guide each toward a Chinese-EV alternative, all the way to the dealer.

The same engine works for any considered, high-value purchase.

PROVEN RESULTS · LATVIA (AUTOPASE.LV)

We already built it — and the engine works.

2 of every 3 visitors we capture are actively choosing or buying a car — set up from zero in 3 months.

MONTHLY IMPRESSIONS · ORGANIC + AI SEARCH

fact · Google Search Console + PostHog Three of four numbers are directly measured. The dealer-call figure is an early extrapolation from that period's run-rate (1 call in a ~4–5 day window). All screen-shareable on a call.

HOW IT WORKS

Five modules turn search traffic into a dealer visit.

- 1

Aggregate

Index 100% of the local market into one comparison portal.
- 2

Intercept

Introduce a Chinese-EV alternative as the buyer compares.
- 3

Rotate

Surface the angle — range, tech, warranty — that fits.
- 4

Retain

Trusted reviews keep them in our network.
- 5

Lead

Track the journey; hand the buyer to the dealer.

context The average car-buying journey is **87 days and 14+ hours** of research — **20–25 touchpoints** across many angles, not one ad on repeat.

Home > Chinese EVs > Xiaomi Auto SU7 Max AWD

Xiaomi SU7 Max — the same power as a BMW i5, €39,100 vs €64,000

The same equipment as a BMW i5 (€64,000) or Audi A6 e-tron — the SU7 Max is €39,100 incl. VAT and comes with a full 3-year / 100,000 km European warranty.

€39 100

incl. 21% VAT

The Xiaomi SU7 Max is a technology flagship: 673 hp, AWD, 0–100 km/h in 2.78 s and up to 830 km of range. It rides on an 800V architecture with a CATL battery — one of the safest and most durable in the world.

UNIT ECONOMICS · ONE FUNNEL

A €38k asset — up to €126k a year per funnel.

Per funnel / year	
Cost of asset — deploy €10k · SEO €15k · maintenance €13k	€38,000
Qualified leads delivered (~€452 cost each)	84
Dealer fee per car sold (in validation)	€1,500

~€38k

at 30% close — break-even

€63k

at 50% dealer close rate

€126k

at full close — upside ceiling

illustrative Revenue scales with the dealer close rate — the lever we optimize. Gross = 84 leads × close-rate × €1,500. Dealers pay only on a sale (fee in validation).

MARKET

A billion-euro fee pool — we start where we already win.

TAM €1.16B → €3.2B Europe-wide dealer-fee pool if we drove every Chinese-EV sale (×€1,500); €3.2B at the 2030 China share.

SAM €63M / yr Chinese-EV fee pool in our launch markets — Latvia + Poland.

SOM ≈€1.5M Annual revenue we target as funnels reach full ramp (~12–24 months).

~13.3M

new cars / yr · Europe

~6% → ~16%

Chinese-brand share · 2025 → 2030

€1,500

our fee per car sold

Basis: Chinese-EV car sales × €1,500 fee (not vehicle value). Sources: ACEA · JATO Dynamics · AlixPartners 2030 outlook · PZPM/SAMAR · CSDD.

THE OPPORTUNITY

Chinese brands are taking Europe — and the timing is now.

- **~6% of Europe today → ~16% by 2030** — a buyer base forming right now (AlixPartners).
- **No buyer-guidance layer exists** — discovery is fragmented classifieds like Mobile.de, market by market.
- **China already won** Africa, the Middle East and Asia. Europe is next — demand must be built, not just listed.

JATO H1-2025: Chinese brands hit a record 5.1% of Europe (+91% YoY); BYD +311% to 70,500 units. Battery-electric is 17.4% of EU new cars (ACEA, 2025).

GO-TO-MARKET

An easy yes: dealers pay only on results.

No onboarding fees, no subscriptions — €1,500 only after a car sells.

What the dealer brings

One dedicated manager and a brand catalog with specs.
That's it.

What we bring

Everything else — traffic, guidance, comparisons, the qualified lead.

moat Compounding organic-search position + cross-domain buyer-journey data + exclusive per-market dealer contracts — each funnel gets harder to copy as it matures. **validation in progress**
Signing Latvian dealers now.

THE MODEL · SCALING

The funnel is a repeatable model.

Clone the playbook per market — a few general comparison portals plus **brand-specialized sites** that own each brand's search, all feeding one offer.

VW Lovers

Owns "Volkswagen for sale" search → guides to a Chinese-EV analog.

Toyota Lovers

Captures Toyota intent → the alternative at compare time.

Honda Lovers

Brand-specific funnel → the same engine underneath.

BMW Lovers

High-intent buyers → Chinese-EV analog in the comparison.

Audi Lovers

One more brand site, one more search position owned.

+ 3–4 general portals

autopase-style comparison hubs covering the whole market.

Poland plan: ~3–4 general portals + 6 brand-specialized sites — each site is one funnel, all running the same Journey System.

ROADMAP

One funnel now → a network across Poland.

Prove it on the smallest market (Latvia) and the biggest in the region (Poland) — and every market in between falls into place on its own.

VISION

An asset-light engine that guides buyers to any high-value market.

Today

Guiding buyers to Chinese electric vehicles

**Tomorrow**

Guiding buyers to the robotics market — and beyond

“Guides buyers to target sellers” is product-agnostic. Once the engine works, the category is just a setting.

THE ASK · ANGEL ROUND

€38,000 for 8% — to replicate the Journey System in Poland.

€10k

Infrastructure & data aggregation

€15k

Organic acceleration (SEO)

€13k

Maintenance & data indexing

One funnel proves the model in Poland**€38k in → €126k gross / year per funnel**

€38k for 8% ≈ €475k post — priced on a working engine and a live pilot. Then a €500k pre-seed (on proven Poland leads) scales to 10 funnels.

TEAM

Operators who've built and scaled before.

JL

Jevgeni Lobats

CEO

Serial entrepreneur, 20+ years across the EU, UK and Asia — companies scaled from zero to €100M+. Deep in IT, fintech and trade.

AD

Aleksandrs Dudarevs

CTO

20+ years in IT and engineering management; launched market-leading transport and logistics solutions across the Baltics.

AP

Anton Patrai

CMO / Growth

10+ years scaling B2B. Ex-Head of Growth at TimelinesAI (3× YoY, AMER/LATAM); co-founder of FlyHelp (23 jurisdictions); builds AI-driven growth automation.

JŠ

Jevgēnijs Štrauss

Head of R&D · Architect

24 years in software architecture; built high-load telemetry for 10,000+ connected vehicles. Multiple tech startups.

The core team has built technology startups together since 2021.
